AmeriHealth New Jersey to launch new mobile site

AmeriHealth New Jersey will launch its mobile site for all iPhone and Android devices on September 26. Creating this mobile site is effective as it assists members in having their health insurance information readily available. The mobile site is an easy-to-use, innovative tool to help people obtain necessary health information on demand. It aims to provide people with a means to track their personal information.

The AmeriHealth New Jersey mobile site provides access to:

- Benefit information
- Open referrals
- Temporary ID cards
- Drug pricing
- Finding a doctor or hospital
- Personal health record
- Customer service

As the use of smartphones and other tech devices increases, AmeriHealth New Jersey will continue to find innovative and useful tools to stay connected with its members.

Check out amerihealth.com from your mobile device.
